

Earthquake Coverage - Are You Protected?

DID YOU KNOW?

- A 7.7 magnitude earthquake struck between the coasts of Jamaica and Cuba last month. Even though this one wasn't in our backyard, it's a strong reminder that the potential for earthquakes never lessens and they can happen at any moment anywhere.
- It is estimated that there are 500,000 detectable earthquakes in the world each year.

ARE YOU PROPERLY COVERED?

- Earthquake coverage is not automatically included on your policy.
- Earthquake coverage can usually be added on by request or a separate policy can be purchased.

Call us today to find out if you're covered.
If not, we can add it or issue a new policy with deductible options.

Around the Office

We are happy to welcome Beth Rasnic to the BK Family!

Beth joined our office in November and has caught on very quickly! She is married with two children - her son is studying Finance at Mizzou and her daughter is headed to Georgia in the fall to study Photography.

In her spare time, Beth likes to spend time in the outdoors gardening, and taking hikes with her dog, Hazel.
